

# CASE STUDY #9 STOLEN VEHICLE RECOVERED

Centennial 360

April 2014

## ABOUT OUR CLIENT

CENTENNIAL 360 has been serving Saskatoon & area for over 45 years. With more than 50 employees, they are a leading provider in home renovations as well as plumbing, heating, cooling, and electrical installation and service. In 2012, Centennial launched its Custom Homes division.

## SITUATION

In the early hours of April 4<sup>th</sup> an individual or individuals broke into Centennial 360's equipment yard. After damaging one vehicle in a failed attempt to hot-wire it, they moved on and managed to get another vehicle started. The first employee to arrive that morning noticed the lock was cut on the equipment yard gate. Mike, the owner was immediately contacted and upon arrival, noticed one vehicle was missing and phoned the police.

## RESULTS

During his initial discussion with the police, Mike was unsure if the vehicle would ever be recovered. He then remembered that actually, he already had the solution. Recently, all of their vehicles had been installed with Text2Car Fleet Tracking devices. A GPS Locate Command was sent to the vehicle and the provided location was forwarded to the police; who were then able to immediately recover the vehicle.

## END BENEFITS

Thanks to the decision to go with Text2Car's Fleet Tracking System, Centennial 360 was able to quickly and easily locate the stolen vehicle and forward this information to the police. They were also able to see every turn and stop the vehicle made that night. It was noted that the Assailants made multiple stops at a specific location. All of this information had been handed to the police to assist in their ongoing investigation of this crime. Attributed to a quick recovery, the vehicle was returned with minimal damage and was soon back to work in Centennial 360's fleet.

*“Without Text2Car we may have still recovered the stolen vehicle, but definitely not as quickly, and our insurance claim would have taken a big hit.”*

- Mike S, Owner Centennial 360
