

FIX-IT

 Road Repair Marking & Project Planning System

CELLULAR-BASED DATA COMMUNICATION
WITH CONTINUAL OPERATION OUTSIDE CELLULAR COVERAGE

USE OF X-IT HANDHELD DEVICE
REQUIRED FOR SYSTEM OPERATION

PLAN SMARTER • PAPERLESS • ACCURATE DIGITAL MAPPING & HISTORICAL REPORTS

INCORPORATED WITH OUR X-IT DEVICE AS A STANDALONE & ASSET MARKING SOLUTIONS

FIX-IT is a road maintenance project planning and tracking tool. With the push of a button, operators, foremen, or field staff can mark areas where road work is needed and mark again when the work is complete.

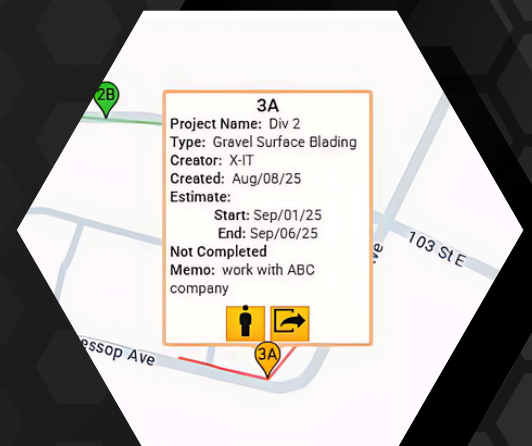

The system automatically digitally records these sites on a map, giving authorized staff instant reports that show pending versus completed work — making it easier to plan, budget, and stay accountable while improving communication across the team.

SYSTEM BENEFITS

- Create & Track Road Projects in Real-Time
- Save Time Spent Manually Tracking Projects
- Streamline Communication Across Teams
- Accurate Data-Driven Budgeting & Planning
- Reliable Map-Based Accountability & Oversight
- Visibility For Council Through Progress Reports

FEATURES

- Mark Road Sections That Need Work While on the Go
- Add Project Details Such as Type, Name, or Notes
- Include Start & End Dates to Keep Projects on Track
- Create & Export Reports with Maps & Tables
- Email Progress Links to Council or Staff Instantly
- Manage & Update Project Status Digitally
- Color-Coded Map View of Pending & Completed Projects
- Secure Web Access for Staff & Council
