CONX WIRELESS

MATERIAL HAULAGE MONITORING

ROAD MAINTENANCE FLEET MANAGEMENT

COST EFFECTIVE • AUTOMATED OPERATION • PRECISE DATA • EASY TO USE

SYSTEM DESIGNED FOR THE PUBLIC WORKS SECTOR

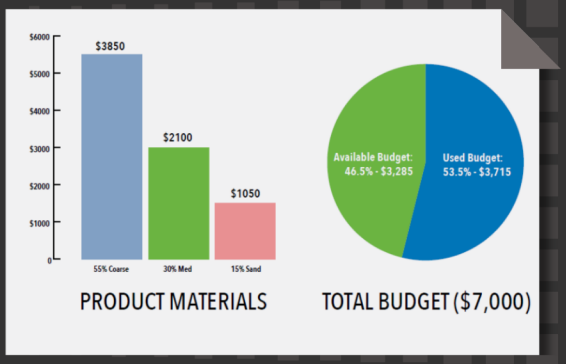
SYSTEM BENEFITS

- Automatically record material application on maps, in reports, and graphs
- Eliminate manual reporting of work completed
- Easy in-cab material type & volume entry
- Immediate and easily presentable information for Council Members, Rate Payers, and grant proposals
- Compare year over year activity to see material program progress
- Export report data as Excel or CSV

MAJOR SYSTEM FEATURES

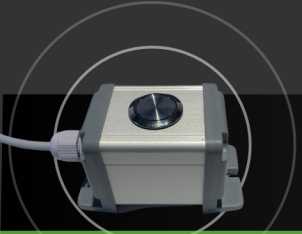
- Visual route-mapping of material drops and travel
- In-cab alarm for operator material input reminders
- Cost breakdown by location, material, and haul distance
- Material-use reports for YTD budget analysis
- Track specific material type per application
- Edit reports to account for other factors
- Add & track material costs by type

BUDGET ANALYSIS



Maximize budget with detailed analysis

Enter volume and type by Keypad or Smart-Phone



SOS MAN-DOWN ADD ON

The SOS unit buzzes every 60 minutes (customizable). Failure to press the reset button triggers an SOS/Man-down notification to your emergency contacts. In addition, operators can send an SOS with a single button push in the event of an emergency.
